

# Bilia

# Sisjön, Gothenburg

Bilia in Sisjön, Gothenburg, is the world's largest all-Volvo facility and the first global pilot facility for Volvo Car Groups. For the entrance, we supplied steel profiles from systems SP 56500 and SP 35000, which were powder coated in a selected color.

**Door and wall partitions:** Steel profile systems SP 56500 and SP 35000

**Other:** Powder coated

**Built in:** 2013

**Architect:** Wingårdh Arkitekter AB

**Producer:** Lackdoor

## Possibilities that provide added value

Our steel profile systems are developed to meet high requirements for design, safety and energy efficiency. To optimize the selection and use of our profiles, we provide manufacturers, architects and builders with full support in the construction process. At any time, you can find advice and guidance on product choice, construction, and the latest profile technology. Our construction, preparation and calculation system - KBK, will provide you valuable support throughout the process. Contact us and we will help you!

## Details that create possibilities:

- Extra narrow and wide profiles
- Profiles adapted for module locks
- Arches, round windows and arched doors
- Finger trap gasket
- Profiles for door leaves and doorframes with grooves for weather stripping
