

# Clinic Center University

# Sarajevo

The Clinical Center University of Sarajevo is one of the leading medical institutes of Bosnia-Herzegovina. Research and care are gathered here under one roof.

High fire protection requirements were in place for the building when it was constructed and our fire-insulated profiles from system SP 76500 were part of the solution.

<b>Door and wall partitions:</b>	Steel profile system SP 76500
<b>Other:</b>	Requirement for fire-insulated profiles
<b>Built in:</b>	2013
<b>Construction company:</b>	Unigradnja d.o.o.
<b>Producer:</b>	Zalmo d.o.o., Mostar, BiH

## Possibilities that provide added value

Our steel profile systems are developed to meet high requirements for design, safety and energy efficiency. To optimize the selection and use of our profiles, we provide manufacturers, architects and builders with full support in the construction process. At any time, you can find advice and guidance on product choice, construction, and the latest profile technology. Our construction, preparation and calculation system - KBK, will provide you valuable support throughout the process. Contact us and we will help you!

## Details that create possibilities:

- Extra narrow and wide profiles
- Profiles adapted for module locks
- Arches, round windows and arched doors
- Finger trap gasket
- Profiles for door leaves and doorframes with grooves for weather stripping
