

Gamla Ullevi

Gothenburg

Gamla Ullevi is the home arena for three Gothenburg teams: GAIS, IFK Göteborg and ÖIS. It is also the national arena for the Swedish women's national football team. In addition, the final matches of Gothia Cup, the world's biggest football youth tournament, are played at Gamla Ullevi. For this football temple in Gothenburg, we supplied partitions from our profile system SP56500 for the 27 Suites and the restaurants inside, and also for the restaurant, gym and stores (comprising 2,500 m² of space) outside the arena.

Door and wall partitions:	Steel profile system SP 56500
Built in:	Opened in 2009
Architect:	Lars Iwdal, Arktitektbyrån
Construction company:	Higabgruppen
Producer:	Fasadsystem, Dalsjöfors

Possibilities that provide added value

Our steel profile systems are developed to meet high requirements for design, safety and energy efficiency. To optimize the selection and use of our profiles, we provide manufacturers, architects and builders with full support in the construction process. At any time, you can find advice and guidance on product choice, construction, and the latest profile technology. Our construction, preparation and calculation system - KBK, will provide you valuable support throughout the process. Contact us and we will help you!

Details that create possibilities:

- Extra narrow and wide profiles
- Profiles adapted for module locks
- Arches, round windows and arched doors
- Finger trap gasket
- Profiles for door leaves and doorframes with grooves for weather stripping
