

# NOD

# Kista

NOD is an open public arena for large and small companies. It is a space that invites, presents, listens and communicates, and that brings new ideas and businesses together. It offers art, culture, science, and new opportunities for collaboration.

We supplied NOD with stainless steel profiles from three different profile systems: SP 976500, SP 956500 and SP 95000.

NOD has BREEAM Very Good environmental certification. The property owner is Atrium Ljungberg.

<b>Door and wall partitions:</b>	Steel profile systems SP 976500, SP 956500 and SP 95000
<b>Other:</b>	Acid-proof stainless steel EN 1.4404 (AISI 316L)

<b>Producer:</b>	ALAB

## Possibilities that provide added value

Our steel profile systems are developed to meet high requirements for design, safety and energy efficiency. To optimize the selection and use of our profiles, we provide manufacturers, architects and builders with full support in the construction process. At any time, you can find advice and guidance on product choice, construction, and the latest profile technology. Our construction, preparation and calculation system - KBK, will provide you valuable support throughout the process. Contact us and we will help you!

## Details that create possibilities:

- Extra narrow and wide profiles
- Profiles adapted for module locks
- Arches, round windows and arched doors
- Finger trap gasket
- Profiles for door leaves and doorframes with grooves for weather stripping
