

# Mangon

# Stockholm

The Mangon Quarter in Södermalm, Stockholm, is a project by Svenska Bostäder. The quarter will offer 169 rental apartments, a preschool with six departments, as well as two commercial spaces and a shelter. With ongoing occupancy and certification according to the Silver level of the Miljöbyggnad (Environmental Building) standard, the project focuses on creating a secure and sustainable indoor environment with low energy consumption. It is a positive addition to the area, where Stockholmshem is also constructing 151 rental apartments in the Persikan Quarter.

Stålprofil has delivered secure steel profiles, and our manufacturer has produced secure and approved door sections with the classification EI30 and S200. In stairwells, it is crucial to choose approved solutions to limit potential fire and smoke development. The choice of fire-resistant and smoke-tight doors in stairwells is essential to reduce the risk of damage and promote the safety of people in a building. It is an investment in creating a safer and more secure environment for residents and visitors.

<b>Profile systems:</b>	Stålprofil system SP 35000, SP 59000 SP 76500, SP 79000
<b>Classifications:</b>	EI30 + s200
<b>Built in:</b>	2020-2023
<b>Developer:</b>	Svenska bostäder AB
<b>Construction company:</b>	Wäst Bygg AB
<b>Producer:</b>	Fasadsystem stål i Borås AB

## Possibilities that provide added value

Our steel profile systems are developed to meet high requirements for design, safety and energy efficiency. To optimize the selection and use of our profiles, we provide manufacturers, architects and builders with full support in the construction process. At any time, you can find advice and guidance on product choice, construction, and the latest profile technology. Our construction, preparation and calculation system - KBK, will provide you valuable support throughout the process. Contact us and we will help you!

## Details that create possibilities:

- Extra narrow and wide profiles
- Profiles adapted for module locks
- Arches, round windows and arched doors
- Finger trap gasket
- Profiles for door leaves and doorframes with grooves for weather stripping
